

PRESS RELEASE  
Paris, November 30<sup>th</sup>, 2020

## NEW FEATURE AVAILABLE IN SAFETYCUBE PROVIDING A PRACTICAL ANSWER TO COMPLIANCE MONITORING REQUIREMENTS

### AUTHORITIES ENCOURAGE PROACTIVE COMPLIANCE MONITORING

All aviation entities are increasingly required to proactively manage risk and compliance. As per ICAO Annex 19, one of the key recommendations is to implement continuous internal audits to monitor compliance with regulations.

This requirement is integrated into all civil aviation regulations. As an example, EASA requires aerodromes to implement a compliance monitoring and specify that it must be continually reviewed:

**“The compliance monitoring should be properly implemented, maintained and continually reviewed and improved as necessary.”**

*AMC1 ADR.OR.D.005(b)(11) - Management system - compliance monitoring*

### MONITOR YOUR LEVEL OF COMPLIANCE AT ALL TIMES THANKS TO SAFETYCUBE

At Safety Line, we are committed to always support your daily operations and help you comply with regulations for improved safety. We have developed a new SafetyCube feature to provide a practical answer to the new compliance monitoring requirements. This new feature helps you perform a continuous review of all your applicable standards and get a clear level of compliance for each of them. You will be able to check and document the compliance of each chapter and item of your standard. This way, you will be audit-ready at any time.

How to perform an efficient **compliance monitoring** with SafetyCube:

- Customize the different types of compliance status you wish to apply
- Evaluate the level of compliance of each item vs. your applicable standards
- Attach proof of compliance documents for each item
- Keep your compliance monitoring up to date
- Export compliance monitoring reports
- Follow up on your compliance by reviewing compliance status history
